YOUNG SCIENTIST DAY

HOW IT ALL STARTED

2014

We organised our first YSD on 27th May 2014 to introduce about 20 hands-on activities as a starter. We received overwhelming response from the public.

We expanded our program to 6 rural schools and traveled around outskirts of Selangor and Perak to promote fun learning..

2015

With support from the sponsors, we organised the inaugural YSD free-for-everyone with more than 40 activities on 23rd April 2016.

2016

HISTORY

YOUNG SCIENTIST DAY

2017

The Young Scientist Day Charity Run was held in UPM to raise as much as possible for Young Scientist Day. It promoted family activity besides facilitating positive changes in improving healthy lifestyle.

YSD received overwhelming responses where more than 1000 participants had registered. There were about 45 hands-on activities including healthy eating, biology, chemistry, physics as well as mathematics.

2018

We believe that children from all walks of life deserve an opportunity. We hosted and visited few orphanages in Selangor to conduct hands-on activities with more than 150 students benefited from this program.

2019

ALL ABOUT YOUNG SCIENTIST DAY 2024

OUR AIMS

to promote
scientific interest

explain science
using hands-on
activities

create fun learning
environment

aid the teaching
and learning in the
classroom
